

# Building Ecosystems for Education and Learning

EdReNe Seminar

Brussels

28-29 May 2019

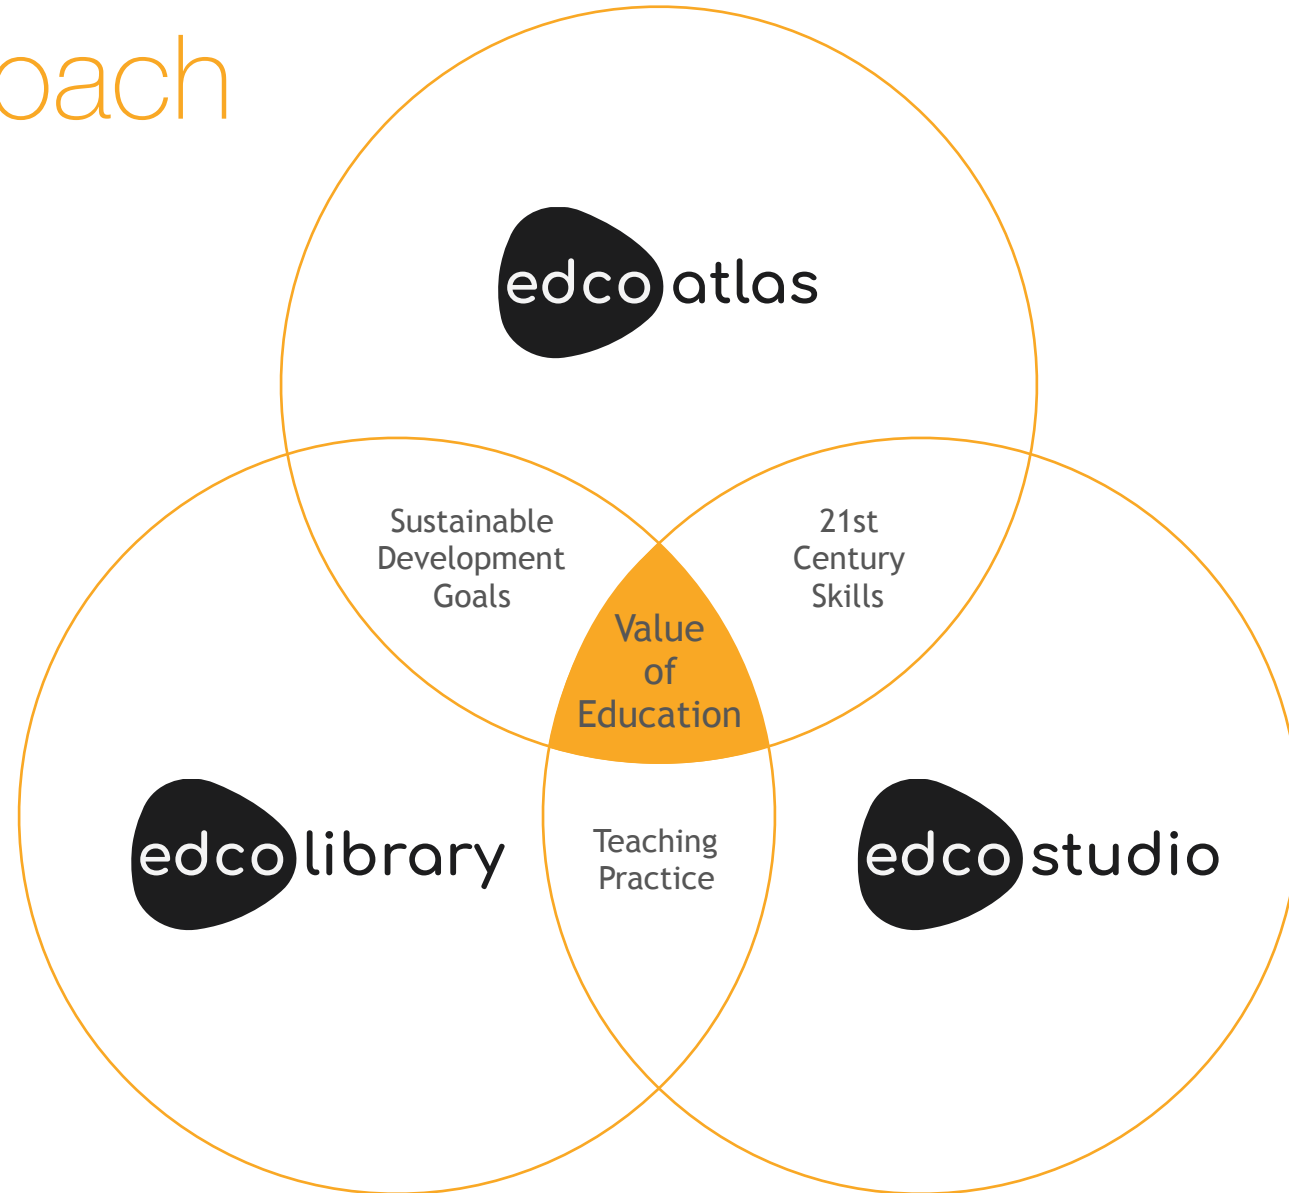

Who? About Us

# Our Vision

We envision a world where schools shape societal transformation and equip their students with the competencies to thrive in 21st century.

# Our Approach

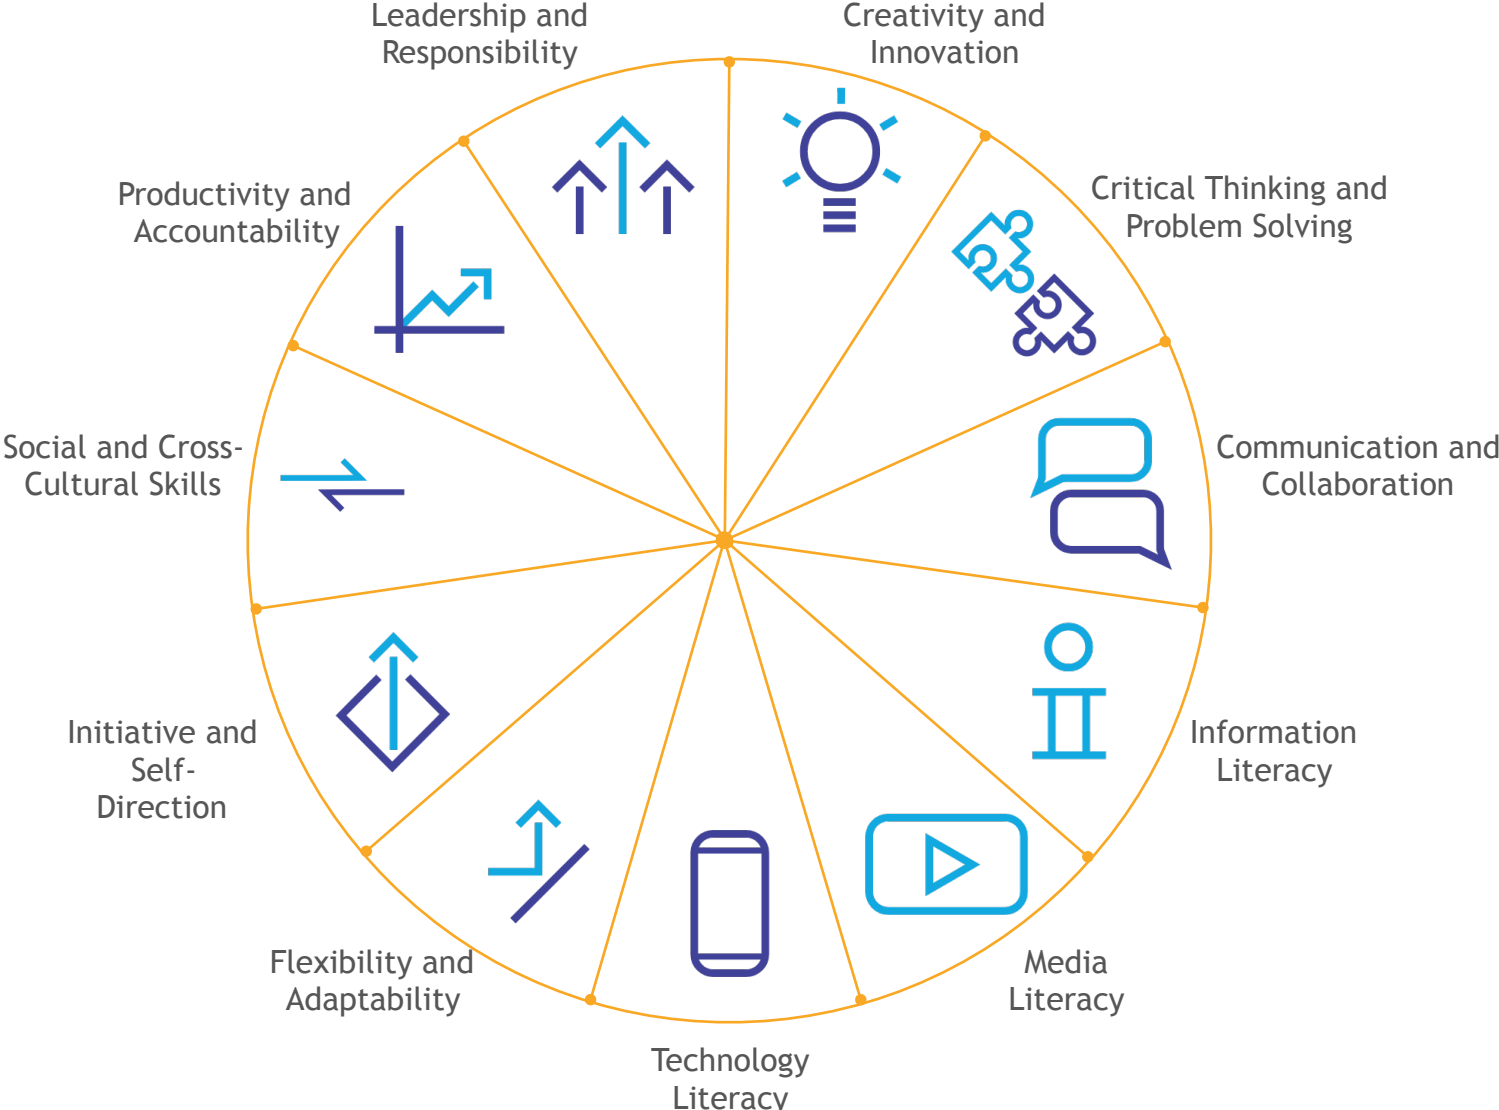

## What teachers say

45% of pupils lack enthusiasm and miss relevance for what they have to learn in school.

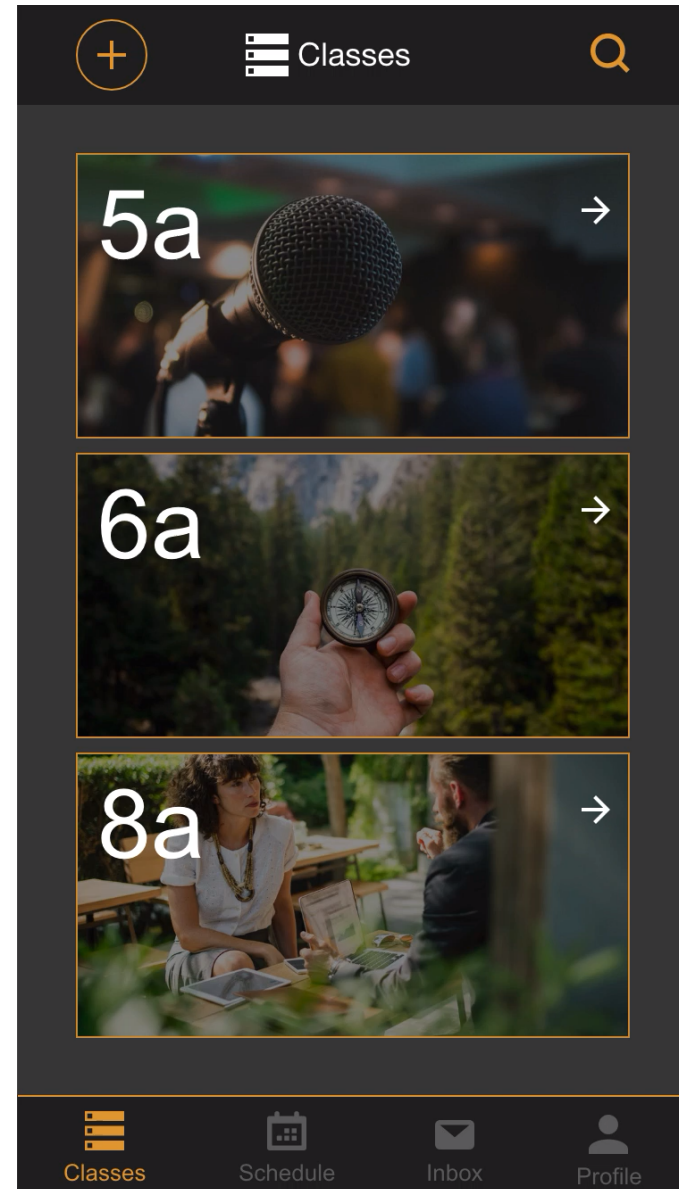

90% of teachers perceive that dealing with their pupils has become more difficult, and are looking for more support.

# 21st Century Skills

# The Studio

A whole-school approach to systematic, collaborative use of educational resources for teachers, to strategically foster 21st Century Skills across subjects

# The Features

Methods & rituals to strengthen social-emotional and metacognitive competences

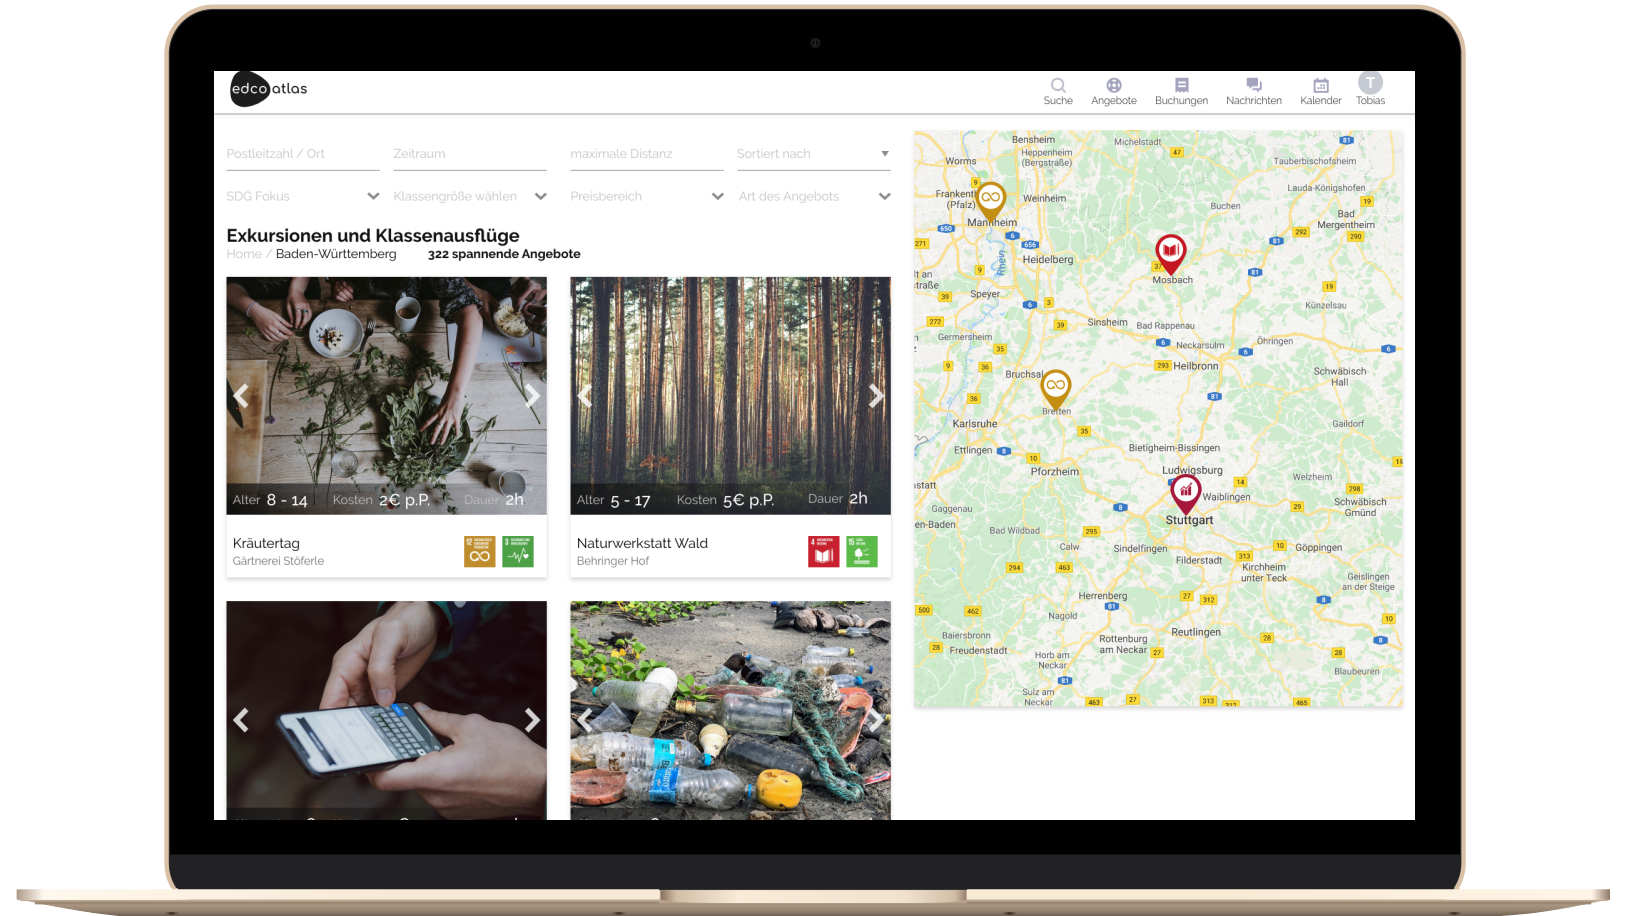

Class teams for better collaboration and consistency

Feedback algorithm for improving the own teaching practice

# The Atlas

atlas.edcosystems.com

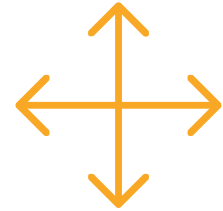

# The Features

Search by topics,  
competencies and  
keywords

# Our Mission

Specialising in the implementation of systemic educational approaches, we enable teachers and schools to implement Education for Sustainable Development in their teaching practice in an interdisciplinary manner, and to equip their pupils with the competencies they need for successful participation in the 21st century society.

Thank you for your  
attention!

Adela Militaru

Chief Learning Officer
